

ПАМЯТИ ВЛАДИМИРА НИКОЛАЕВИЧА ГУБАНКОВА

(13 октября 1941 г. - 14 сентября 2016 г.)

Владимир Николаевич Губанков родился в Москве 13 октября 1941 г. В 1958 г. он закончил с медалью школу № 167 и поступил в Московский инженерно-строительный институт, а в 1959 г. перевелся на физический факультет МГУ им. Ломоносова. В 1964 г. после окончания МГУ В.Н. Губанков был зачислен на должность инженера в ИРЭ АН СССР (ныне – ИРЭ им. В.А. Котельникова РАН) в отдел В.В. Мигулина.

В начале своей научной деятельности Владимир Николаевич занимался вопросами взаимодействия СВЧ-излучения с полупроводниками. В 1968 г. он защитил под руководством В.В. Мигулина кандидатскую диссертацию “Исследование взаимодействия электромагнитного излучения с детекторами из $n\text{-InSb}$ в приемных системах миллиметрового и субмиллиметрового диапазонов”. В 1978 г. он защитил докторскую диссертацию на тему “Нелинейные и параметрические явления в сверхпроводниках на сверхвысоких частотах”. После защиты диссертации В.Н. Губанков был назначен заведующим отделом и продолжал заниматься проблемами слабосвязанных сверхпроводящих структур.

В последние годы В.Н. Губанков занимался исследованиями и разработкой высокочувствительных приемников спектрометров терагерцового частотного

диапазона на основе высокотемпературных сверхпроводников.

Владимир Николаевич Губанков являлся по совместительству профессором Московского физико-технического института: читал лекции студентам, руководил дипломниками и аспирантами. Под его руководством защитили кандидатские диссертации 10 человек, четверо из которых стали впоследствии докторами наук.
