	<p>Каталог включает 545 датировок из различных районов Сибири и Дальнего Востока, выполненных лабораторией геохронологии в процессе геологических, палеоклиматических и археологических исследований за период с 1969 по 1975 года. Все датировки систематизированы по региональному признаку и сопровождаются необходимой информацией, обеспечивающей их геолого-геоморфологическую и археологическую интерпретацию.</p> <p>Каталог рассчитан на широкий круг специалистов по четвертичной геологии, географии и археологии, занимающихся проблемами стратиграфии и геохронологии позднего плейстоцена и голоцена</p>

Орлова Л.А.	
Издание:	
Наука, Новосибирск, 1990 г., 128 стр., УДК: 551.796 (571.1)+550.93, ISBN: 5-02-029469-1	
Язык(и)

	<p>В монографии изложены новые материалы по радиоуглеродной хронологии позднеледниковых и голоценовых отложений Барабинской равнины. Осуществлена палеоклиматическая интерпретация изученных разрезов и на основе данных радиоуглеродного датирования проведена корреляция отложений различных генетических типов. Представлена детальная стратиграфическая схема позднеледниковых и голоценовых отложений исследуемой территории. Помимо крупных климатоседиментационных циклов, представляющих собой картируемые геологические тела, выделено 16 более дробных подразделений в ранге пыльцевых зон, которые могут служить в качестве корреляционных уровней.</p> <p>Книга рассчитана на геологов, палеогеографов, географов, палинологов, почвоведов, археологов как научно-исследовательских учреждений, так и производственных организаций</p>
